## EuropeAid financial contributions to the UN system in 2004

---

### Methodology

These statistics have been prepared on data retrieved from CRIS and OLAS information systems (1) and finally verified by EuropeAid operational units. In contrast, in previous years statistics were prepared by collecting data from the operation units and checking them against those retrieved from CRIS and OLAS. The new methodology, which offers the advantage of more reliable statistics in less time, has been possible thanks to recent improvements of the CRIS information system, in particular the introduction of a specific code called Legal Entity for each UN counterpart.

These statistics were prepared by searching within the above databases the contracts signed between 1 January and 31 December 2004 by both the Commission and the UN. As a consequence, these statistics do not include projects in pipeline (2). In other words, figures concern amounts actually contracted in 2004, and not earmarked amounts.

### Presentation

Contributions are aggregated by UN Secretariat and by agency/fund/program. They have been broken down in geographical areas. Data are presented in tables and graphs. A summary table covers the period 1999-2004, completed by a list of UN bodies' acronyms.

These statistics relate only to aid under EuropeAid's responsibility (3). As a consequence, they do not include possible contributions from other EC Directorates General, for example the Directorate General for Humanitarian Aid (ECHO, € 89.9 million in 2004) and that for External Relations which is responsible for the Rapid Reaction Mechanisms (€ 17.10 million in 2004).

### Trends

In the last five years EuropeAid contributions have almost quadrupled. In the last year the major increases have been for UNDP (up from € 176 million in 2003 to € 403 million in 2004), and FAO (up from € 11 million in 2003 to € 47 million in 2004). The UNDP increase last year is due to two large programmes in Afghanistan (€ 19.5 million) and Iraq (€ 81 million).

---

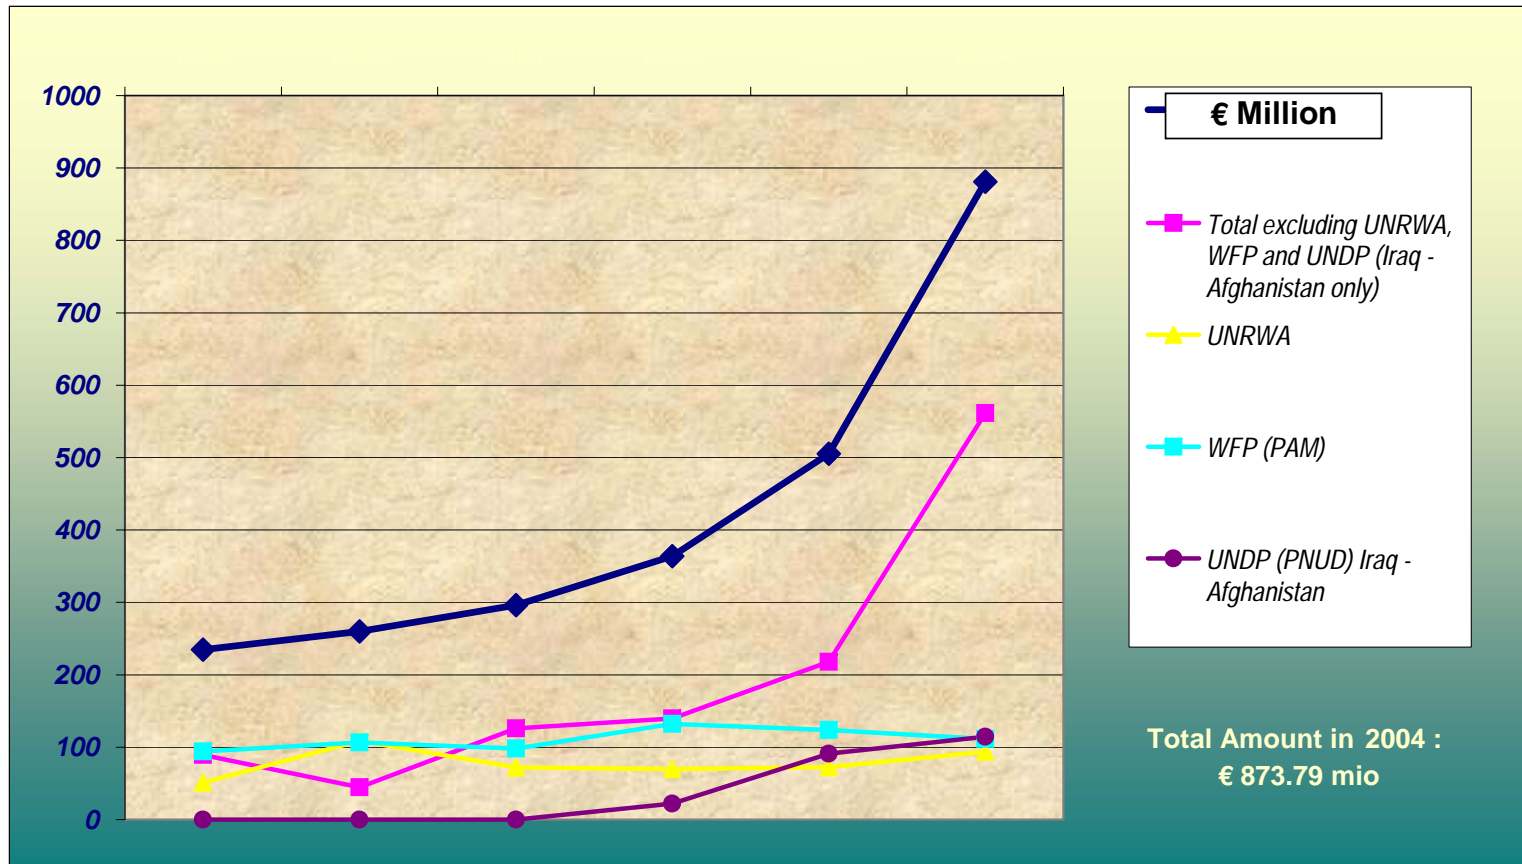

(1) CRIS (Common Relex Information System) and OLAS are databases containing the financial data of projects funded out of respectively the general Commission budget and the European Development Fund. While this last is the funding source of aid to the ACP countries (Africa, Caribbean and Pacific, about € 3 billion committed per year), the general Commission budget is the funding source of aid to the remaining part of the world (about € 4 billion per year).

(2) E.g.: those agreed in principle, those at identification stage, etc.

(3) EuropeAid is responsible for implementing the external aid of the European Commission which is funded by the European Community budget and the European Development Fund. It does not deal with pre-accession aid programmes (Phare, Ispa and Sapard), humanitarian assistance, and macro-financial assistance, the Common Foreign and Security Policy (CFSP) or the Rapid Reaction Facility.
